Edward Heard assumed leadership of Life Connex as a General Manager for the Pensacola office on November 20, 2009. Among his top priorities at Life Connex are customer service and implementing policy as the company reaches toward higher heights. Edward and his team are committed to ensuring that customers experience both prompt service and accuracy when handling their concerns.

During his tenure, Edward has helped create portions of the Quality Assurance manuals as well as many inter-office forms to create paper trails for company records. Edward began his employment with Life Connex in August 2009, and prior to becoming General Manager, Edward worked as a Quality Assurance agent. Before joining the Life Connex family, Edward worked for the ADT Security Services as the Operations & Staffing Support Coordinator.

A native Floridian, Edward received his Bachelor of Arts degree in Political Science/Legal Philosophy at the University of North Florida in 2008 after earning his Associates Degree in Mathematics from Florida State College in Jacksonville, FL in 2006.

Mr. Thomas Biddix

Biography 2009

Mr. Biddix is a Florida native. His entrepreneurial spirit was evident at an early age. Among his accomplishments, Tom was elected President of Future Business Leaders of America and The Diversified Work Program. Tom also holds the distinction of being one of the youngest real estate agents to receive their broker's license in the state of Florida. He was married in 2001 and is a devoted family man. Tom and his wife, Stacey, have 3 wonderful young children. They make their home in the quiet community of Melbourne Florida. Tom is an avid pilot, boater and golfer.

Mr. Biddix has had a long and dynamic career as an entrepreneur in the telecommunications industry. Mr. Biddix has developed new and innovative ways to bring telecommunications services to people who are typically underserved by the major tier one providers. In the early 1990's, as a young man, Mr. Biddix began his career at Suntree Cellular as an ATT cellular agent. Mr. Biddix quickly recognized the opportunity to provide cellular service to many customers who did not have a sufficient credit score required resulting in customers being required to pay a security deposit. As a home based inventor, Mr. Biddix developed one of the first prepaid cell phones. He created a chip that when inserted into a cell phone, controlled the phone and the customer came into Mr. Biddix's store and purchased more time, which Mr. Biddix then loaded into the customer's cell phone chip.

Opportunity for competition came about with the sweeping changes contained in the 1996 Telecommunications Act. Mr. Biddix utilized the opportunities created to help serve the credit challenged customer. Mr. Biddix grew this successful idea and invention into Pre-Paid Solutions, Inc., a large international company by raising angel capital, venture capital and eventually took this company public onto the NASDAQ stock exchange. The early prepaid stigma, that prepaid was unacceptable and only for credit challenged individuals, the bust of the dot com bubble and the fraud of MCI-World Com in prepaid cellular took its toll on Mr. Biddix's company, which he eventually sold. Proudly, 100,000 customers are still using an evolved version of his technology today.

Mr. Biddix has now turned his attention to serving customers with credit challenged home phone needs. Mr. Biddix understands the importance for citizens to have basic communication service, including 911 emergency services. Mr. Biddix is now focused on taking his vast experience and knowledge that he developed in prepaid cellular industry and creating similar systems that can bring those same advantages and efficiencies to the prepaid home phone market.

TARIFF FORMAT

A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be page 11.1.

B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I
- 2.1.1.A.1.(a).I.(i)
- 2.1.1.A.1.(a).I.(i).(1)

D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

Services are furnished subject to the availability of facilities and subject to the terms and conditions of this tariff in compliance with limitations set forth in the Commission's rules. The Company's services are provided on a statewide basis and are not intended to be limited geographically. The Company offers service to all those who desire to purchase service from the Company consistent with all of the provisions of this tariff. Customers interested in the Company's services shall file a service application with the Company which fully identifies the Customer, the services requested and other information requested by the Company. The Company reserves the right to examine the credit record and check the references of all applicants and Customers prior to accepting the service order. The Company may act as the Customer's agent for ordering access connection facilities provided by other carriers or entities when authorized by the Customer, to allow connection of a Customer's location to a service provided by the Company. The Customer shall be responsible for all charges due for such service arrangement. Any marketing efforts will clearly indicate to potential customers the nature of the transaction which is being offered. Materials submitted to prospective customers will clearly indicate that those customers will be changing their long distance carrier if they accept such solicitation. SECTION 3 - DESCRIPTION OF SERVICE**3.1 Computation of Charges**

- 3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.
- 3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange (the area code and three digit central office code) associated with the originating and terminating telephone numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V & H) coordinates for each exchange and the airline distance between them will be determined according to industry standards.

- 3.1.3 Timing begins when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. The Company will not bill for uncompleted calls.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

13700 Perdido Key Drive, Unit 222
Pensacola, Florida 32507
Customer Service: (866) 744-0949

Any objection to billed charges should be reported promptly to the Company. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where overbilling of a subscriber occurs, due either to Company or subscriber error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled; provided, however, in the event that the Company has willfully overcharged any Customer, the Company shall refund the difference, plus interest, as prescribed by the Commission.
